SUMMARY

I am an enthusiastic Information Technology graduate with a strong passion for coding and problem-solving. I primarily work with Java (Core and Advanced), and have a solid understanding of front-end technologies as well. I enjoy building efficient, real-world solutions through technology and continuously seek to improve my skills. I am eager to grow as a software developer, contribute to impactful projects, and be part of a forward-thinking organization where I can help My develop reliable, user-focused technologies.

SKILLS

- **Programming Languages:** C/C++, Java Core+Advance
- **Web Technologies:** Java Server Pages (JSP), Servlets, HTML, CSS
- **IDE's:** NetBeans, VS Code, Eclipse, IntelliJ.
- **Tools:** Maven, Gradle
- **Databases:** SQL, MY- SQL
- **Framework:** MVC(JAVA)
- **Personal Skills:** Teamwork, Team building, Problem-solving

ACADEMIC DETAILS

Degree	Specialization	Institute	Year	CPI/%
B. Tech	*Information Technology*	Medi-caps University	2022-present	8.50
Class XII	*Physics, Chemistry, Mathematics*	Choithram School , Indore	2021-2022	73
Class X		Choithram School , Indore	2019-2020	87.6

INTERNSHIP

- **GAIL India** [June '25 - July '25]
  - Studied pipeline communication networks, focusing on message transformation, data flow, and transmission proto- cols within industrial systems.
  - Proposed the integration of AI/ML models for predictive analysis and anomaly detection to enhance operational efficiency and decision-making.

PROJECTS

- **Movie Ticket Booking System** [May '25-present]
  - Developed a dynamic movie ticket booking web application using JDBC, Servlets, JSP, and SQL, enabling users to view movies, check showtimes, and book or cancel tickets securely.
  - Implemented role-based authentication for users and admins, allowing administrators to add, edit, and manage movies, theaters, and schedules through an interactive interface.
  - **Technologies**: Core Java, Advanced Java, JDBC, SQL, JSP, Servlet, HTML, CSS, JavaScript, Eclipse IDE, (Planned: Spring Boot, REST API, Spring Security)

- **Online Marketplace with Warehouse Storage** [February '25 - May '25]
  - Designed an online marketplace where users can purchase, sell, and store items, and relocation and space optimization are simpler.
  - Created user registration and safe login features, product browsing and buying, and warehouse item management features.
  - **Technologies**: Java (Servlets, JSP), MySQL, HTML, CSS.

- **AI-Resume Analyzer** [September'25 - November'25]
  - Automatically extracts key information from uploaded resumes (skills, experience, education) using NLP and PDF/DOCX parsing libraries, helping users instantly evaluate and organize candidate data.
  - Compares resumes with job descriptions and provides a match score, skill-gap analysis, and suggestions, making the recruitment process faster and more accurate.
  - **Technologies**: Python, Streamlit, NLP, spaCy, NLTK, PyPDF2, pdfminer, MySQL, HTML, CSS

CERTIFICATE

- C/C++ Programming (Online school of programming)
- Java core+ advance (Online school of programming)

EXTRA-CURRICULAR ACTIVITIES

- **Participation**
  - Participate in National Science Competition at Medi-caps University
  - Participate in Smart India Hackathon and selected as top team from college
- **Other Extra-Curricular**
  - Participated in cricket and badminton tournaments
